

FORMETCO®

Excellence is our standard.

Hardware available
in Hot Dip Galvanized
finish

The Hurricane Frame

Engineered for the worst conditions

- Never take down your panels for a hurricane again
- The Heavy Duty design is engineered for coastal markets and winds up to 177 mph
- The Standard design is capable of withstanding 120 mph winds
- The rear vinyl blocks wind and light and can serve as self promo space
- Extensions install easily using our Clip-It-Cutout System™
- Available in standard and custom sizes
- Our frame enhances your display with a clean finished look

Now Shipping Pre-assembled

- Our new packaging consists of one face per skid for a quick install
- We can ship with the vinyl hardware and printed vinyls included
